Re: Reversing the Incandescent Light Bulb Ban

Dear President Trump,

The Soft Lights Foundation is a 501(c)(3) non-profit whose mission is to advocate for the protection of individuals from the harms of Visible Light radiation emitted by products that use Light Emitting Diodes and for the protection of the natural night resource. The decision by the Department of Energy to effectively ban the incandescent light bulb has been a catastrophe for public health.

We know that you have previously attempted to block the DOE's restrictions on the incandescent light bulb which forces the public to buy hazardous LED light bulbs, but that President Biden overturned your efforts. The public is now having o buy unsafe LED light bulbs because incandescent light bulbs are no longer available for sale.

The Soft Lights Foundation can assist you with overturning the DOE's incandescent light bulb ban, either through an Executive Order, or by repealing the DOE regulations. The Soft Lights Foundation can provide your administration with the evidence you need to ensure that your efforts to protect the sale of safe incandescent light bulbs will survive any legal challenges.

Please have one of your staff members or a member of Congress contact me to help you with the effort to restore the availability of incandescent light bulbs to protect the health, safety, comfort, and freedom of choice of all Americans.

Sincerely,

/s/ Mark Baker
President

Soft Lights Foundation
