

Change.org Ban Blinding Headlights! Petition Comments

September 2024	
Commented Date	Comment
10/31/2024	"Everyone's life is precious and worth saving"
10/31/2024	"People shouldn't be blinded while traveling 60mph+, the fact this hasn't been dealt with sooner is a failure to keep the public safe."
10/31/2024	"Impossible to see oncoming cars with those headlights that were typically pointing down and to the right with older cars. Intersections and people following blinds drivers in mirrors as well."
10/29/2024	" https://education.nationalgeographic.org/resource/light-pollution/ National geographic channel on light pollution. Its bigger that we think it is. Its about day and night light pollution as LED DRLs during day are adding to increased hot temperatures."
10/28/2024	"These are increasing even though I'm pretty sure they used to be illegal. Scientific research has been supporting the use of red-based lights at night, to the effect of blue-filtering lenses being sold widely. There is no logic behind bright blue lights at nighttime other than being able to see everything on the road-- however, this fails to consider the other drivers approaching who are then unable to see past these lights. It is actually a road hazard, and can disrupt our sleep and for some people potentially even at least temporarily damage their retinas."
10/28/2024	"You can't see anything and you can't even hardly see the moon and stars"
10/28/2024	"Things have gotten so far out of hand with these bright headlights. These car manufacturers care more about installing spy software in your car than issuing a nation wide recall and replacing these blinding headlights with softer lights. Even after all of the accidents and deaths no one in power who can make a difference seems to care. Only in America!"
10/27/2024	"I believe that this causes accidents especially in remote areas going around bends it's literally blinding and I believe has taken lives already we need to make sure this is passed immediate In 2012 led's were still classified as lasers ffs!"
10/25/2024	"I myself struggle to see on the roads with people with LED headlights that are on during the day and brights are almost always on at night!! today (October 25th 2024) for example, multiple and I mean multiple cars with their brights on during the DAY for christ sake and at night just to have them on do headlights really need to be this bright?? NO they do not. I'm blinded every day and unable to see properly because of these headlights they are unethical for main road use!!! Many people crash due to these lights blocking their view of the road. LED LIGHTS DO NOT NEED TO BE ON CARS!"
10/24/2024	"Blinding headlights are a totally unnecessary problem which can be fixed with this simple legislation"
10/24/2024	"It's truly a problem"
10/24/2024	"I'm blinded daily by headlights that are too bright and probably not pointed in the correct direction - it makes my commute to work in the morning very difficult and much less safe than it could be"

10/23/2024	"Been driving me crazy(lol) that a lot of people don't understand how dangerous these are, and even end up getting upset at the drivers who's vision becomes affected. Still dealing with a blind spot from the amount on the roads where I live."
10/23/2024	"These LED lights are dangerous!!! The lights are so bright and always in the on coming traffic eyes!! You would think these lights would at least be pointed down at the road instead of up at the eyes??? I've lost sight of the road multiple times when vehicles with LED lights coming towards me. Something needs to be done about these lights!!!!"
10/22/2024	"I have chronic and severe migraines that make me photophobic almost all of the time. This makes night time driving very painful and difficult."
10/22/2024	"LED headlights seriously need to be banned. If we can't legally use our high beams, then how are these okay instead? My high beams are dimmer than most LEDs! Driving at night is truly a nightmare for me, especially with my astigmatism. These lights are unnecessary, no one needs to be able to see 40 miles ahead, for goodness sake. Ban these. They're terrible and unsafe."
10/22/2024	"SAFETY!!"
10/22/2024	"These LED headlights are a hazard for oncoming drivers"
10/21/2024	"Have seen cases in clinic, primarily deer-strikes, where a driver couldn't see the deer because of oncoming headlight glare. Please do the absolute smallest thing for us and better regulate automotive headlights."
10/21/2024	"I have a dimming rearview mirror and it's a testament that lights are too bright when that's not even enough anymore to keep lights from blinding me from behind. Not to mention, changing lanes becomes dangerous when some jerk is hitting you with his high beam LEDs. I've also noticed that not long after being hit with a blast of light to the eyes, a migraine often sets in. Enough is enough. We know that we can't trust consumers to act responsibly. There is no reason auto manufacturers should even give them the option to endanger others like this."
10/20/2024	"I have been pulled over more than once for going too far RIGHT in right hand lane. Why? I was blinded by led headlights. I can no longer drive after dark which means I do less shopping (not a 'day person', and refuse to change) and has severely effected my social life. Really feel they (government) are trying to blind us. Yet another reason not to trust them."
10/20/2024	"Ban these lights! It's ridiculous."
10/18/2024	"I believe LED headlights are dangerous. No matter how low they are "aimed", if the road grade or curvature is on a slope the lower-positioned driver will still get blinded. The situation becomes extremely perilous on any two lane undivided highway or country road."
10/18/2024	"These lights are absolutely horrible, we need to get rid of all the bright LED lights!! Bike lights, head lamps, car, truck, motorcycle, semi.....all of them! We do not need these lights so bright!!"
10/18/2024	"These LED Headlights are blinding us out here on the road trying to safely get to where we are going!!! Ban and outlaw LED headlights NOW!!!"
10/16/2024	"Every day when I take my children to school I have to ride with my visor down because of these lights. And it still doesn't help. My car sits low and I'm short so the bigger vehicles shine directly into my windows, rear view mirror and causes a major glare. In the short 10 mins it takes to get them to school I have eye pain and a headache from the brightness. I can't see at night so I don't drive. I've bought

	transition lenses for my glasses which do nothing. These lights are a safety risk and need to be banned or dimmed way down."
10/15/2024	"I ride motorcycles and have almost gone off the road at night due to the insanely bright LED headlights from oncoming large new trucks and SUVs. Sometimes when cars are tailgating me their lights are so bright I can no longer even tell if mine are on? Driving at night sucks now. I'm just grateful I was a youth during the halogen days when you didn't go blind driving at night. Deeply sorry for all the lives lost and folks hurt from our government's inability to address this issue in a timely manner."
10/14/2024	"the headlights are way out of control and endangering me and my family while we're on the road at night. I'm generally not a huge fan of lots of regulations for stuff in transportation or any other industry, but this is a big problem."
10/13/2024	"Other drivers on the road that have these super bright headlights make it nearly impossible for me to drive at night without the use of sunglasses. I have been pulled over multiple times because of it and given written warnings. The manufacturers of these super bright headlights need to stop and politicians need to start banning them in their states. Without sunglasses I literally cannot see the road to drive. I have nearly wrecked several times driving home from work over the last couple of weeks, because I couldn't see the road."
10/13/2024	"I drive 1500-2000 mi./wk for Lyft in the PHX metro area ("The Valley") and I am astonished by how many times I am blinded by LEDs in cars behind me/in mirrors & from head on traffic. It is literally like everyone is driving w their hi-beams on, but they're not. Last time I checked, before these f***ing LED headlight bulbs became a thing, if you had your brights on and approached a police cruiser from the front... if said police vehicle flashes you to turn your brights off and you don't, you would be pulled over and ticketed! So why are these a**holes who use these nuisances for bulbs in their vehicles headlamps not being pulled over and ticketed now?? It's the most egregious safety hazard I have ever encountered in the road in 37 years of driving. These things are DANGEROUS AF!!!!!!!!!!!!!! Ban them already, FFS!!!!!!!!!!!!!!!"
10/11/2024	"I'm tired of being blinded by blue light LED headlamps and outside lighting."
10/11/2024	"Mechelle D Thompson"
10/10/2024	"Since money is the biggest motivator in the USA: Think of all the lost money, and hit to the economy from every person who avoids driving at night now due to being blinded. These lights need to go. Regulate them. Ticket them, and generate even more money as you fix this."
10/9/2024	"I'm a young adult with decent vision and am starting to have a hard time driving at night because so other people's lights are so bright they blind me. I can't feel confident making left turns when LED headlights are in front of me because I can't see if other traffic is coming or if there are pedestrians in the crosswalk."
10/6/2024	"Something has to be done! With so many experiencing issues and difficulties with nighttime driving due to glare of headlights, how can this problem be ignored. It's unsafe but necessary to drive during nighttime. It looks like everyone is driving around with high beams on. Older model headlights are safer. How could the powers that be in California not want to make the roads safer for all."
10/5/2024	"If People Need THAT HORRIBLY BRIGHT Of A Headlight To See To Drive. Then They Shouldn't Be Driving AT ALL..."
10/5/2024	"I've had so many near horrible accidents due to how bright they are. it's ridiculous that they were able to even be allowed in the first place."

10/4/2024	"They're AWFUL"
10/2/2024	"I already have vision issues I don't need unnecessary bright lights impeding my vision when driving"
10/1/2024	"Connie"
