Daytime Headlight Overkill

RANT

The video shows a close-up of a car's side mirror. The mirror reflects a very bright, intense light from a headlight, which is causing a significant amount of glare and obscuring the view. The background shows a city street with buildings, including one with a sign that says "PLACE TOWER". The video player interface at the bottom shows a progress bar at 0:01 / 0:08 and various control icons.

1. Luminous Intensity at Peak Glare

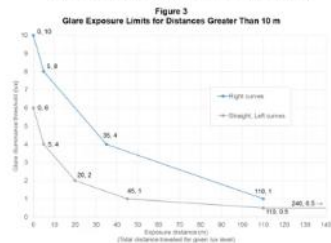

Compare to NHTSA assumptions that the regulator limit is 1400 cd

2. Illuminance Profile

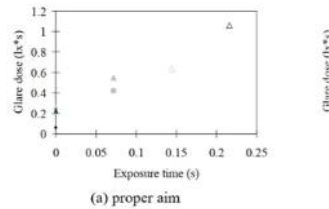

Compare to what we are seeing on the road today to NHTSA's assumptions of illuminance profiles from 2008

3. Glare Exposure Limits
